### Gemini Court Product Testimonial

In August 2008 we ended a cost sharing agreement with another internet service provider. This was largely due to the system operating poorly, as well as only obtaining 10% profit on the sale of internet access. We sought to find a better system that would allow us to profit from providing internet to guests and residents.

We approached numerous companies with different models before deciding on Arinda Internet's package. The main reason we chose Arinda is because we found them to be IT professionals, not sales people. As a family business ourselves, it was also reassuring to deal with another owner operated business.

Arinda internet essentially tailored the system to our specifications when many other IT companies "tell" you what you should have in place based on what suits the particular company. Instead Arinda listened to what we wanted and how we wanted to be able to deliver the service to our guests. They installed a system that has now operated for over two years and has improved our profit margin on internet substantially. We now even have an internet kiosk at reception from them as well.

I cannot recommend Arinda enough for their service, product knowledge, and sincerity.
